Certara’s Synchrogenix™ Writer

is designed specifically to assist medical writers in creating content through an easy-to-use interface to streamline your writing deliverables through automation, reusability, and machine learning. Unlike traditional methods of manually writing content, the cloud-hosted, 21 CFR Part 11 compliant software platform:

- **Empowers your medical writers to focus on higher risk priorities**
- **Ensures consistency and quality through standardization**
- **Decreases your production time and reduces costs**

Certara’s Synchrogenix™ Writer is continually adding new functionality to make you more efficient in the creation of your documentation, recognizing that certain pieces can be re-used and reformatted to gain efficiencies through technology. The first step in streamlining your writing deliverables is to change the narrative on your patient safety narrative writing.

“... The fact we could produce the first drafts so quickly was a key benefit for our timeline. And the fact that the QC review was built in was an additional factor that contributed significantly to meeting our timeline goal.”

- Editor, Medical Writing | Leading biotechnology company
Reduce time to completion while providing consistency across your batches of patient narratives.

Managing narrative projects with moving timelines is challenging, especially given the complexities that go into preparing your data for use. With the narrative builder features in Synchrogenix™ Writer, you can manage thousands of narratives to full completion, including review, in a fraction of the time.

- Create custom project templates with ease
- Re-use narrative sections and/or templates from previous projects
- Apply datasets to projects and preview that patient’s data populated in your template sections in real-time during development
- Eliminate the need to rely on programmed patient listings as sources for narratives
- Gain efficiency, quality, and consistency across your narrative set
- Work directly from data to ensure written narratives match the data’s narrative

For added flexibility, Certara has a regulatory services team of expert medical writers trained using Synchrogenix™ Writer. As your organization encounters peak workloads, our trained staff of narrative writing experts can support you as needed.

Customer Journey + Technology = Success

We understand the struggles our customers face and how we can better develop technology solutions that save you time and resources on getting your therapeutics to market faster. By pairing the customer journey with ever-advancing technology and an unrivaled services team, Certara is uniquely positioned to provide you the flexibility to license Synchrogenix™ Writer, utilize our regulatory services team, or a combination of the two to meet your medical writing needs.
