

Compliance Checker

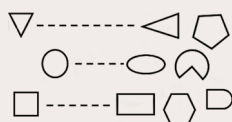

Identification of controlled substances

The first step towards meeting compound compliance legal requirements is the identification of controlled substances such as narcotics, psychotropic drugs, and chemical warfare agents. Compliance Checker combines Chemaxon search technology with a regularly updated content package to provide a flexible tool for efficiently screening chemical structures against controlled substance regulations.

Harnessing cloud technology and a microservices-based structure, our platform offers a versatile solution that caters to businesses of all sizes, from start-ups to large pharmaceutical companies.

Cutting-edge Markush search for generic regulations

Reliable similarity algorithm for "substantially similar" compounds

Cloud-ready infrastructure, SaaS solutions

- Quick and accurate check against generic regulations
- Alert for "substantially similar" compounds
- Extensive coverage and automatic update of national and international regulations
- User-defined regulation categories
- Knowledge Base editor for managing proprietary content
- Single molecule and file check GUI
- Wide range of molecule input formats, including SMILES, molecule name, and CAS#
- Easily customizable report formats
- Seamless integration using the dedicated RESTful API
- SaaS solutions for any sized business
- Modular with cHemTS, the Harmonized (Tariff) System code assigner tool
