

Shorten the Design-Make-Test-Analyze Cycle with D360

Discovery scientists who need to understand their compounds' structure-activity relationships and prioritize their compounds for development spend a lot of time manually querying data or relying on IT to build their data views. The industry-leading D360™ software empowers large pharmaceutical companies to efficiently search vast datasets and enables small biotech firms to stay agile, focusing their R&D expertise on science rather than navigating through a maze of time-consuming data wrangling tasks.

D360 provides self-service data access, integrated data visualization and analysis that allow compound prioritization, development of SAR and many other scientific data workflows in chemistry and biology domains to improve the effectiveness of data-driven research.

6,000+ Scientists from Big Pharma To Small Biotech Use D360™ To Access Discovery Research Data Quick And Easy

- **One-Click Data Access:** Customizable dashboards with easily shareable widgets for quick data retrieval.
- **Self-Service Data Search:** Connects to multiple data sources with a user-friendly drag-and-drop interface.
- **General Data Analytics:** Includes sorting, filtering, and a variety of data visualizations.
- **Small Molecule Analysis:** Features tools like R-Group analysis, matched molecular pair analysis, and activity cliff notifications.
- **Biologics & Modality Analysis:** Handles various biologics with consistent assay aggregation and sequence alignment.
- **Research Partner Integration:** Secure data sharing and collaboration with external partners.

Features

- Chemistry Sketchers
- Structure Visualization
- Data Analysis
- Discovery Information Portal
- Research Reporting
- Electronic Notebook
- Virtual Compound Capabilities
- Scientific Literature Search
- SAR Analysis and Molecular Design Tools
- Matched Molecular Series Analysis (MMS)
- Biologics Discovery Toolkit
- Peptide Sequence Alignment Viewer
- Multi-Parameter Optimization
- Oligonucleotide Search and Analysis

“ We need to be able to query, pivot and dive deep into our drug discovery data, and D360 is the best platform we have found for that. Compared to our previous research informatics solution, D360 is saving us hundreds of hours annually on data analysis. That is an important contribution to our research. The Certara team is tenacious and resourceful. They always find a solution. That’s what has made our relationship so successful. ”

- Dr. Keith Hornberger
Director of Chemistry, Arvinas

Choose The Solution That Is Optimized for Your Organizations' Needs

D360 Express: Designed for smaller pharmaceutical organizations, providing quick and affordable deployment with essential tools for small molecule and biologics data access, visualization, and analysis.

D360 Partner: Add-on product for secure, seamless data sharing and collaboration with external research partners, allowing them to access relevant data and analysis tools without compromising data security.

D360 Is Within the Scope of Certara Software Division's ISO 27001 Certification

About Certara

At Certara, we accelerate medicines to patients, partnering with life science innovators. Together we advance modern drug development with biosimulation, regulatory science, and market access solutions.
