

CERTARA® | Chemaxon

Marvin

Marvin is the only chemical drawing tool you will ever need combining our chemical intelligence with a clean user interface and high quality visuals.

We know you want to work with the fewest applications possible across all workflows, from drawing a chemical structure from scratch to sharing the end-result in a presentation, or exporting it to a document to publish. Stop wasting time on alternating between drawing tools and looking for hidden features: enjoy Marvin's clean UI in all workflows and draw as fast as possible. Smoothly handle large structures and complex reaction schemes down to the smallest detail, and create figures with chemical correctness and impeccable visual quality.

Draw faster than ever

Create publication quality chemical schemes

Take advantage of chemical intelligence

- Search bar
- Customizable toolbar
- Alignment guide
- Display physical-chemical properties
- Import structures by name
- Built-in journal style
- Import and export images
- Crop images
- Rich text formatting
- Variety of visual elements
