

# Henryette Schatt, PhD

Enterprise Account Manager

Certara offers a global network in major pharmaceutical hubs, enabling predictive simulation, data-driven modeling, and tailored AI solutions. With experts across Europe, the Middle East, and Africa, we collaborate across borders to accelerate your programs.

## About Henryette Schatt, PhD

Henryette Schatt, PhD, Enterprise Account Manager at Certara, has over 25 years' experience in the pharmaceutical and biotech industries. Holding a PhD in Computational Chemistry, she specializes in guiding candidates from early discovery through clinical phases. Informed by a decade of expertise in the field of patient-reported outcomes, she has formulated the hypothesis that processes need to be enhanced before drug candidates enter clinical trials.

Location: Erlangen, Germany

Language: German, English, Spanish

## My mission

As the primary point of contact for mid-sized pharmaceutical and biotech companies in Germany, Austria, Switzerland, and Central Eastern Europe, I am dedicated to expanding Certara's presence in these key markets. My responsibility is to ensure that our customers receive exceptional service and support across the full breadth of Certara's offerings. I collaborate closely with my colleagues from the software portfolios and the consulting service team to deliver tailored solutions that meet our clients' needs and enhance their experience with us.

## The best part of working with Certara clients

For me, every moment is critical, whether big or small. I celebrate all of them. I'm happy when our customers are happy. When we work together, we find the perfect solution, which is just the right fit.

## Message for customers

My mission is to support the unseen heroes in drug development: sites and patients.

You (and they) deserve to receive drugs that have been thoroughly tested *in vitro*. Certara can help you avoid wasting precious time taking candidates through clinical trials that will never reach the market due to findings that could have been identified through Model-informed drug development (MIDD). Please reach out to [henryette.schatt@certara.com](mailto:henryette.schatt@certara.com) to learn how Certara can help you move the needle towards more efficient drug development with the power of MIDD.

## About Certara

Certara accelerates medicines using proprietary biosimulation software, technology and services to transform traditional drug discovery and development. Its clients include more than 2,600 biopharmaceutical companies, academic institutions and regulatory agencies across 70 countries.
